

**KPN supplies international data network to
Groeneveld Transport Efficiency**

Date

17 December 2007

Number

122

Groeneveld Transport Efficiency B.V. will soon be offering its online products and services using a network provided by KPN International Network Services. The new MPLS VPN network will connect Groeneveld's 18 European, US and Canadian offices, allowing them to offer their customers worldwide the best possible service. The company's online services relate to desktop management and planning. For safe storage of all international company data, Groeneveld will be using KPN's secure CyberCenters in Europe and North America. KPN and Groeneveld have signed a five-year contract.

Groeneveld's international network, comprising all its offices worldwide, will be managed from the Netherlands by KPN. This makes it easy to connect new Groeneveld customers anywhere in the world. Since an internet connection is critical to Groeneveld's service activities, the solution provided by KPN makes use of KPN's Security Portfolio and applies its Managed Firewall Services.

'This network is in line with our international growth ambitions, with more and more of our products and services being offered online,' says Dennis Daalhuizen, CEO GreenCat HCE, subsidiary of Groeneveld. 'We chose KPN on the basis of the company's quality and years of experience. This network will enable us to serve our customers in the transport sector even better.'

Carolien Nijhuis, Vice President KPN International Network Services: 'On an international level, too, the demand for one-stop shopping is increasing. Groeneveld has gained an excellent reputation with innovative products that increase efficiency and security, and we are proud to partnering with them in this area. We are happy to be able to contribute to the realization of Groeneveld's ambitions.'

About Groeneveld Transport Efficiency B.V.

Groeneveld Transport Efficiency B.V. is active worldwide in the transport, off-road and industrial sectors. With 18 offices worldwide, Groeneveld develops automated systems for customers in the transport sector that can handle all their desktop management, planning and tracking & tracing tasks for them. One of Groeneveld's wholly owned subsidiaries, GreenCat B.V., specializes in the sale of board computers and related applications to customers in the transport sector to optimize their logistics processes. With KPN and other partners, GreenCat B.V. will be selling active hosting solutions in Europe using managed data connections provided by KPN.

KPN International Network Services

KPN International Network Services is one of the group's business units providing managed ICT services to corporate customers, responding to their demand for one-stop shopping for both telecoms and IT solutions. Further information on KPN's international (ICT) solutions is available on www.kpn.com/international.
